Judul: Impacts of tropical cyclone Seroja on the phytoplankton chlorophyll-a and sea surface temperature in the Savu Sea, Indonesia

The screenshot shows a Yahoo! Mail interface. The top navigation bar includes links for HOME, MAIL, NEWS, FINANCE, SPORTS, ENTERTAINMENT, LIFE, SEARCH, SHOPPING, YAHOO PLUS, and MORE... The user's name is 'nurjannah' and the account is 'yahoo/mail PRO'. The search bar contains 'osjo'. The email list shows a message titled 'Fwd: Reminder to Submit Final Files - Access-2021-31606' from 'Riza Yuliratno Setiawan' dated 'Fri, Apr 15 at 4:23 PM'. The email content is a forwarded message from 'IEEE Access' dated 'Tue, Oct 26, 2021, 13:09'. The subject is 'Reminder to Submit Final Files - Access-2021-31606' and the recipient is 'nurjannahnuridin@unhas.ac.id'. The message body reads: '26-Oct-2021 Access-2021-31606 - Impacts of tropical cyclone Seroja on the phytoplankton chlorophyll-a and sea surface temperature in the Savu Sea, Indonesia Dear Dr. Setiawan: Congratulations on your recently accepted paper to IEEE Access. Please note that we are still waiting on you to upload your final files. Once you upload those files, they will be sent to production. Please send all final versions of your files through the "Awaiting Final Files" queue in your Author Center on ScholarOne Manuscripts. Once you have completed the submission of your final files you will not be able to make changes until you have received your page proofs from IEEE. If you have any questions about the required materials or the final submission process please doesn't hesitate to contact me. Sincerely, Ms. Namrata Sinha IEEE Access'. At the bottom of the email are three buttons: 'Thank you.', 'Got it.', and 'Cool.'. On the right side, there is a profile card for Riza Yuliratno Setiawan and a promotional banner for Alibaba Cloud's 'FREE 1 TB CDN TRAFFIC PLAN'.

10-Sep-2021

Dear Dr. Setiawan:

Your manuscript entitled "Impacts of tropical cyclone Seroja on the phytoplankton chlorophyll-a and sea surface temperature in the Savu Sea, Indonesia" has been successfully submitted online and is presently being given full consideration for publication in IEEE Access.

As noted during the submission of your manuscript, IEEE Access is a fully open access journal. Open Access provides unrestricted access to peer-reviewed articles via IEEE Xplore. In lieu of paid subscriptions, authors are required to pay an article processing charge of \$1,750 after the article has been accepted for publication.

Your manuscript ID is Access-2021-31606. Please mention the manuscript ID in all future correspondence to the IEEE Access Editorial Office. You can also view the status of your manuscript at any time by checking your Author Center after logging in to <https://mc.manuscriptcentral.com/ieee-access>.

At this time, we kindly request your assistance in helping us improve IEEE Access by taking this QUICK 4-QUESTION SURVEY in the following link: [https://research.ieee.org/jfe/form/SV\\_7R63xmcN4etQVEX](https://research.ieee.org/jfe/form/SV_7R63xmcN4etQVEX)

Thank you again for submitting your manuscript to IEEE Access.

Sincerely,  
IEEE Access Editorial Office

18-Oct-2021

Dear Dr. Setiawan:

Your manuscript entitled "Impacts of tropical cyclone Seroja on the phytoplankton chlorophyll-a and sea surface temperature in the Savu Sea, Indonesia" has been accepted for publication in IEEE Access. The comments of the reviewers who evaluated your manuscript are included at the foot of this letter. We ask that you make minor changes to your manuscript based on those comments, before uploading final files.

Please be advised that you are **not permitted** to add or remove authors or references post-acceptance. However, we encourage you to check the formatting of your references to ensure that they are accurate in terms of bibliographic details as well as consistent with [IEEE style](#). Additionally, please take this opportunity to improve the English grammar and check spelling, as the article is only lightly edited before publication.

Once you have updated your article accordingly, please submit the final versions of your files through the "Awaiting Final Files" queue in your Author Center on [ScholarOne Manuscripts](#). **All files intended for publication need to be submitted during this step, even if some files are unchanged from the initial submission.** If you do not submit all files during this step, it can delay the publication of your article, or result in certain files not being published.

To assist you with preparing your final files, attached please find a Final Files Checklist.

Once you have completed the submission of your final files, the **accepted version** of your article will be posted Early Access on IEEE Xplore within 2-3 business days. Within 7-10 business days you will receive your page proofs, at which point you can make **minor** edits as necessary. Once you approve the proofs, the final version will replace the Early Access version on IEEE Xplore.

For more information on what to expect after you submit final files, please visit our [Post Acceptance Guide](#).

After you submit final files you will automatically be directed to the Electronic Copyright Form. Once the copyright information is completed, within a few business days you will receive an email from Copyright Clearance Center (CCC) to settle your APC balance of \$1,750 USD plus applicable local taxes by check, credit card, or wire transfer. **Please note that once you submit final files your article is considered published, and you are responsible for covering the cost of the APC.** If you need assistance with the payment process, please contact CCC Customer Service at [IEEESupport@copyright.com](mailto:IEEESupport@copyright.com).

Thank you for your fine contribution. On behalf of the Editors of IEEE Access, we look forward to your continued contributions to IEEE Access.

Sincerely,

Dr. Jijia Jiang  
Associate Editor, IEEE Access

Reviewer(s) Comments to Author:

Reviewer: 1

Recommendation: Accept (minor edits)

Comments:

**OVERVIEW:**  
This study analyzes a certain tropical cyclone (Seroja) which impacted the Indonesian Seas in 2021. The authors report on the effects of winds to phytoplankton, sea surface temperature (SST), and other biotic parameters using remote sensing methods.  
The study has good methods and approaches, and the findings are interesting. The figures are good but need larger labels.  
This study does need some work on the grammar, however, I would recommend that the entire paper be read by a native English speaker or given to a professional editing service before publication. Particular attention should be paid to effective and clear sentence structure, correct use of articles, verb tense, and correct word forms. As it stands now, it is very difficult to read. Therefore, I would request the grammar be significantly improved before publication.

**RECOMMENDATION:**  
Revision needed. Suitable for publication only if the grammar gets a complete overhaul.

**COMMENTS:**  
Abstract, Line 26: Change the opening to read: "Tropical Cyclone (TC) Seroja was a rare climatic event..."  
Page 1, Line 56 (column 1), and elsewhere: When referring to a specific tropical cyclone or storm, you do not use the article "the", e.g., "... TC Dahlia...", not "...the TC Dahlia..."  
Page 1, Line 54 (second column): "precedence" is not the best word, try "priority"  
Page 2, Line 18, first column: "respectively" is not needed here  
Page 3/8 Line 24L Fig 1a: Please correct Fig 1a, as the orange star could not be clearly seen to show the BMKG station of Alor Island. Please also consider removing some of the unrelated names of islands to make a clearer red box boundary, or else you might use the standard cartographic method to show islands' names.  
Page 3/8 Line 45 onwards: The authors use multiple spatial resolutions of datasets, each with their own uncertainty. E.g.: the wind data is 0.25° × 0.25°, while the chlorophyll-a concentration from Himawari-8 is 5 × 5 km, and the SST is 9 × 9 km. How would you justify the final spatial resolution and the uncertainty of your result?  
Page 4/8 Line 32L: please correct Climatology to Climatology  
Page 4/8 Line 13R: please delete the year "From 7 to April 15, 2021", consistent with the other date format  
Page 5/8 Line 35 onward: The authors clearly explain how the TC Seroja affects the chlorophyll-a concentration and SST. However, the map shown is too small to see the exact value of both parameters, while there is no statistical information in the form of a table provided. Would you: (a) provide larger figures, especially Figs 3-5 which contain very important observational parameters, and (b) provide a table showing important statistical parameters, such as mean, standard deviation, etc. of U10, EPV, chlorophyll-a concentration, and SST to give a clearer value for the reader to understand the effect. Rather than looking at 5 different tables back and forth.  
Page 6/8 Line 50L: Could the authors mention the exact time needed for phytoplankton to grow based on the observation: "The abundance of nutrients in the Sava Sea after the passage of TC Seroja may indicate that the phytoplankton needs time to grow."

-All figures need larger labels
