

Ms. Ref. No.: LWT-D-22-01233

Title: Comprehensive evaluation of Functional Components, Biological Activity and Minerals for Yam species (*Dioscorea polystachya* and *D. alata*) in China

LWT

Dear Dirpan,

LWT - Food Science and Technology has recently received the above manuscript, which has now passed a pre-assessment for quality; the next step is peer review of the science to determine suitability for publication. Thus, because of your expertise in the field covered, I would be very grateful if you would undertake this peer review on the manuscript to evaluate its scientific merit.

You should treat this invitation, the manuscript and your review (as well as other reviewer comments shared with you) as confidential. You must not share your review or information about the review process with anyone without the agreement of the editors and authors involved, irrespective of the publication outcome. If the manuscript is rejected by this journal and the author agrees that the submission be transferred to another Elsevier journal via the Article Transfer Service, we may securely transfer your reviewer comments and name/contact details to the receiving journal editor for their peer review purposes.

I have included the abstract of the manuscript below to help in your decision.

Please note that we request reviewers to primarily focus on scientific aspects of the paper. However, you may choose to make other comments but the editor will handle the editorial and other presentation issues. Reviewers should refrain from recommending citations of their own publications.

Please note our main priority is to provide constructive comments to authors. As such, we might invite you to answer specific questions about the manuscript- these questions will be presented to you through the online submission system should you agree to review the manuscript. Your responses can be used in conjunction with your written feedback through free text comments to the authors. If you have previously reviewed for the journal then you will notice this small change.

If you accept this invitation, you will have 14 days to review this paper. If you are unable to act as a reviewer at this time, I would greatly appreciate your suggestions for alternate reviewers.

To accept this invitation, please click here:
