Dear Executive Editor
Journal of Engineering Science and Technology (JESTEC),

I would like to inform you that you sent an email to my other email (andar_baso@yahoo.co.id) following the content below. Then, I replied to your email by using andar-baso@yahoo.co.id but I worry that it is not received or spam.

Therefore, I would like to inform you that I am the one of authors of the manuscript as first and corresponding author that you requested me to review it and then I apologize for rejecting that request.

I had reviewed a manuscript of JESTEC once before. Therefore, I am very happy if I will be a reviewer again later on.

Once again, I would like to apologize for this matter.

Thank you very much for your kind attention and I am looking forward to your reply.

Best regards,

Suandar Baso

Judul: Paper ID ME20051 /Requesting paper review for JESTEC, First round of Review Process/

Dear Dr.

Greetings from the Editorial Board of JESTEC.

The following attached manuscript titled

AN EXTENDED VALIDATION OF FREE CFD APPLICATION TO SHIP RESISTANCE PREDICTION
FOR USING IN PRELIMINARY DESIGN STAGE

has been submitted to JESTEC for consideration for publication, and I am writing to request that you, as an expert in its topic area, review it and make a recommendation regarding its acceptability.

I hope that you will agree to review this manuscript, in which case you will have **2-3 weeks** to complete the review.

If you would like to have more than 4 weeks to complete the review, could you please indicate the time frame within which you expect to return the review report.

I appreciate your contribution in maintaining the quality and value of JESTEC, and look forward to your response.

Best regards

Some quick guidelines to our respected reviewers

We would appreciate if you take note that whenever appropriate, papers are evaluated on the basis of the following seven criteria. Please try not to focus on the editorial issues/mistakes as too many of them may lead to the author's frustration. We want the authors, when we revise their paper, to focus on our comments/concern related to the seven above-mentioned criteria.

1. **Research question**: why the authors do this research and what is its importance and application.
2. **Novelty**: a paper gives new ideas, derivations, applications that has been not studied before or little- or not in depth-studied.
3. **Literature review**: to identify the research gap with recent references from 2010 onwards.
4. **Research methodology**: analytical, numerical or experimental or mixed. What is the contribution of the authors, assumptions and/or approximations used, description of apparatus and its limitations, steps of experiments, etc.
5. **Quality of results**: and the depth and logic of the discussion.
6. **Insight** conveyed and recommendations that might be used by others for future work.
7. **English**: used effectively to communicate the ideas and easy to understand with least or no grammatical error or typos.
