**Introduction:**

The literature review covers the method of calculating the added resistance.

**Methodology:**

There is a well-detailed demonstration of the preparation for the experiment and compliance with the test conditions of the towing vessels.

**Results and Discussion:**

The results of the experiment are presented in a clear graph and tend to be in the same direction. They are consistent with other results.

**References:**

The reference document format is based on the standard format. The number of documents is sufficient for reference.
