Reviewer 1

In this study, Sugianto et al. reported a case of collision tumors of small cell carcinoma and squamous cell carcinoma in the maxillary sinus. The case report could enrich our knowledge of rare cancers.

(1) In Figure 4, negative controls should be provided for the immunostaining.

(2) More details should be provided in the figure legends to describe the figures.

(3) The exact tumor sites should be clarified by arrows in all figures.

(4) In the Keywords, the use of "Neoplasms, Multiple Primary", "Carcinoma, Small Cell", "Carcinoma, Squamous Cell" is confusing. Do the authors mean "multiple primary neoplasms", "small cell carcinoma", and "squamous cell carcinoma"?

(5) The initial of the first name should precede the last name, for example, "Sugianto I" should be written as "I Sugianto" if the last name is "Sugianto".

Reviewer 2

This is an interesting case study reporting on a collision tumour made up of SCC and SmCC. This is a rare but interesting occurrence that needs reporting. However as a case report, perhaps it has too many figures and some may be combined. I would question if Figure 3 is important.

By: Irfan Sugianto

Thank you for submitting the manuscript entitled 'Collision Tumor of Small Cell Carcinoma and Squamous Cell Carcinoma of Maxillary Sinus: Case Report' by Irfan Sugianto, which has been accepted for publication in Molecular and Clinical Oncology.

In the online user area ([Replace Files](#)), please find the proofs of the article with minor revisions. These should be revised within one week.

Please check the proofs carefully (editing/minor linguistic changes have been made), and let us know whether any corrections are required. Do this by highlighting the error and the correction required. It is important that any changes made are highlighted so that the editor can see what has been changed. In addition, avoid making any unnecessary/extensive changes to the manuscript since it has already been proofread and edited. Please ensure that changes are made to the Proofs document sent and not to any prior manuscript versions. Furthermore, do not send all
