Good morning,

Thank you for submitting your revised paper on "Numerical estimation of ultimate strength on double hull oil tanker cargo area" on the MARSTRUCT 2021 website.

On revising your paper, we have noticed that some of your references are incomplete, namely, all the names of each publication. Two references specifically have been highlighted.

You are asked to look through your references thoroughly, completing them where necessary, and returning the new version to me by email.

Also, the initial of the first name of Prof./Dr./Mr. Juswan is missing. You are asked to add it.

Please use the attached version of your paper to introduce corrections, where some formatting corrections have been made.

Your reply at your earliest convenience is requested and appreciated.

With kind regards,

Fatima

Dear Ms/Mrs Fatima Pina

Attachment, please find the revised full paper #023 according to the highlighted correction. In case of the Mr. Juswan, that's only one word "JUSWAN".

Sincerely yours,
Muhammad Zubair Muis Alie
