Dear Professor A.A. Martynyuk  
Institute of Mechanics,  
Nesterov str.3, 03057, MSP 680  
Kiev-57, Ukraine

First of all, I would like to introduce myself, I am Syamsuddin Toaha, lecturer at the Department of Mathematics, Hasanuddin University, Indonesia. We have research about the dynamics of population, the dynamics of prey and predator. In this research, we analyse the local and global stability of interior equilibrium point. The dynamics of population is also related to the harvesting problem, including maximum profit and maximum present net of revenue. Some examples and simulations are given to confirm the analytical results.

We intend to submit a manuscript of our research result for consideration for publication in the Journal of Nonlinear Dynamics and Systems Theory (ND&ST). The manuscript of the article is attached.

Thank you for your attention and assistance in advance.

Best regards,

Syamsuddin Toaha

Dear Professor Syamsuddin Toaha,

We have a preliminary positive opinion on your manuscript with some remarks. For our further work with this manuscript, we need your solution for the following possibilities:

1. you choose the method of publication in the general queue (24-30 months) without payment.
2. you choose our service Priority Page Charge Publication (USD25.00 per page). In this case, we can schedule the publication of your article in issue 1, 2022 of our journal.

Please let us know your solution.

Yours faithfully,  
Editor

Dear Professor Toaha,

Thank you for your intention to use our PPCP service. Below are the comments of the Reviewer on your manuscript and in the appendix are our recommendations for potential authors of the journal.

We will be planning to publish your paper in issue 1, 2022 of the Journal ND&ST. For our further work, we need a pdf file of your article, which takes into account the comments of the Reviewer and our recommendations.

Yours faithfully  
Editor

-----  
From Review:

This article is of interest to the journal.

However, some additional work is needed:

1. The manuscript is not presented in the style log file (see [www.e-ndst.kiev.ua](http://www.e-ndst.kiev.ua)).
2. Section MSC(2010) should contain codes from sections 70Kxx OR 93-XX.
3. In the section Concluding remarks, it is necessary to more strictly indicate the novelty of the results obtained and their potential application.

We apologize for being late in sending the revised manuscript of our article due to the limited movement of our team due to the covid-19 pandemic in our city.

We have looked at reviewers' suggestions and article writing guidelines. We have also fulfilled the reviewer's suggestions. The revision of this manuscript has also followed the given format, reduced the number of pages, and has been written in latex.

The revised manuscript is attached.

Thank you for your attention and assistance in advance.
