Comments to the Author

The manuscript entitled "PENALIZED SPLINE ESTIMATOR WITH MULTI-SMOOTHING PARAMETERS IN BI-RESPONSE MULTI-PREDICTOR NONPARAMETRIC REGRESSION MODEL FOR LONGITUDINAL DATA" is useful in the bi-response multi-predictor nonparametric regression analysis, and it contains many mathematical concepts, i.e. matrix (or vector), and linear model concepts. There are some revisions that must be made by authors. They are:

1. There is a little mistake in writing β for equation (7) in page 7 (please, see attached files);
2. There is a little mistake in writing formula for M_2 in equation (16) in page 10 (please, see attached files);
3. The authors have not been defined matrix D of $D_{1.1}, D_{1.2}, \dots, D_{1.p}$ and $D_{2.1}, D_{2.2}, \dots, D_{2.p}$ (or simply $D_{r.k}$ for $r=1, 2$) in equations (17) and (18) in page 10 (please, see attached files);
4. The authors have not been defined ρ and ρ_{jk} such that they become ρ_{jk} for $j, k=1, 2, \dots, p$ in equations (17) and (18) in page 10 (please, see attached files);
5. In page 12, authors should not use symbol ρ to represent correlation, because in equation (1) in page 5, the authors have used symbol ρ for representing the response. I suggest that the authors can use another symbol, for example ρ_{jk} , to represent the correlation.

If the manuscript has been revised by the authors according to my suggestions, the manuscript may be considered for publication in the Songklanakarini Journal of Science and Technology.

Comments to the Author:

Dear Author,

Please revised your manuscript following the reviewers comments carefully and return back to SJST asap.
