Dear Professor Firman,

We hereby inform you that we have a preliminary positive opinion (with some comments) on your manuscript. For our further work, we need your solution for the following possibilities:

1. You choose the method of publication in the general queue (24-30 months);
1. You choose our service Priority Page Charge Publication (USD25.00 per page). In this case, the manuscript will be submitted for publication in the next issue of the journal.

Please let us know your solution.

Regards and best wishes,
A. Martynyuk

Dear Professor A.A. Martynyuk

Thank you for your email. As for my manuscript publication option, I'd like to choose the second option, i.e. Priority Page Charge Publication.

Thank you for your work on my manuscript

Best regards,

Firman

Dear Professor Firman,

Thank you for your intention to use our PPCP service. Attached are our Recommendations for potential authors and comments from the Reviewer. Please take into account our recommendations in the final version of the manuscript and send us the pdf file again for further work by the editors.

Respectfully,
Editor of the Journal ND&ST

From Review

The manuscript is of interest to the journal. However, it needs additional work. Namely:

1. To the surname Firman you need to add the initials (first name);
2. The abstract needs editing and a more complete presentation of the result;
3. There are no codes MSC-2010 in the manuscript, (see MSC-2010 section nonlinear dynamics 70Kxx and systems theory 93-XX);
4. the text of the manuscript needs careful editing (see page 2 .. "some some" ... etc.)
5. in formula (3) it is necessary to clarify that τ is a vector.
6. The list of References is not made according to our Instructions for authors.
