Screening result : Revise

---

Dear Dr. Muhammad Zubair Muis Alie,

I am writing to you regarding the manuscript #ME-858 entitled "PROGRESSIVE COLLAPSE ANALYSIS OF LOCAL ELEMENTS AND THE ULTIMATE STRENGTH OF RORO SHIP" which you submitted to International Journal of Technology (IJTech).

After we made an initial screening we found some problem including:

1. Unsuitable Format
2. Poor analysis.

We recommend that this manuscript be revised in order to proceed to peer review.

You must respond to this revise and resubmit request before 22 Feb 2018, after which point we will presume that you have withdrawn your submission from International Journal of Technology (IJTech) Online System.

Decision Result : *Revise*

---

Dear Dr. Muhammad Zubair Muis Alie

We have finished the review and made decision on your manuscript entitled [ PROGRESSIVE COLLAPSE ANALYSIS OF LOCAL ELEMENTS AND THE ULTIMATE STRENGTH OF RORO SHIP ] which was submitted to International Journal of Technology.

We have decided that your manuscript **Need to be Revised**

We also send you the review result from the reviewers. Here is the detail review result:

Notes from Editor:

Please revise according to reviewer's comment and it is suggested to include at least 2 relevant IJTech articles as references

Reviewer (1)

Introduction:  
-N/A

Methodology:

Section 3. Method of Analysis Reviewer feel that the 550 mm ship's length is not rational compared with that breadth and depth , as mentioned in the body text. The method would be give significance effect for the maritime industry, if the analysis for the target ship and other ship type such as Oil Tanker, Bulk Carrier, Containers, etc, could be presented by full cargo hold area analysis. Corresponding to the

title, it is better to added the damage condition as well as intact condition in the analysis as proposed by the author/s.

Results and Discussion:

Figure 10. it is legend in the graphic Ansys and HUIss. This two legend donot explain clearly in the body text of section 3 'meyhod of analysis and that of section 4 ' results and discussion'.

*Decision Result : Revise*

Dear Dr. Muhammad Zubair Muis Alie

We have finished the review and made decision on your manuscript entitled [ PROGRESSIVE COLLAPSE ANALYSIS OF LOCAL ELEMENTS AND THE ULTIMATE STRENGTH OF RORO SHIP ] which was submitted to International Journal of Technology.

We have decided that your manuscript **Need to be Revised**

We also send you the review result from the reviewers. Here is the detail review result:

Notes from Editor:  
please revise according to reviewer's comment

Reviewer (1)

Introduction:

N/A

Methodology:

I. 3. Method of analysis 'The breadth and depth of the ship are 15000 mm and 10093 mm, respectively.' The reviewer has an opinion that if the author could describe the principle dimension of target ship, the data will be useful to the reader. In this condition, the reader could have imagination regarding the ratio of the ship dimension and its effect corresponding to the title. II. 3. Method of analysis The reviewer feel that, the short explanation on the HULLST program could give historical background to the reader,

especially, this explanation is useful for the first time reader in this field. III. If the author feel that the work is limited to the intact condition, it is better to limit in the title or limit within keywords.

Results and Discussion:

see comment on methodology section.
