[biodiv] Submission Acknowledgement Inbox x

Ahmad Dwi Setyawan <smujo.id@gmail.com>
to me

Fri, Mar 18, 2022, 11:05 AM

Irmawati Irmawati:

Thank you for submitting the manuscript, "Identification, genetic diversity, and comparative evolution of the striped snakehead *Channa striata* (Bloch, 1793) in Wallacea" to Biodiversitas Journal of Biological Diversity. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Submission URL: <https://smujo.id/biodiv/authorDashboard/submission/10766>
Username: irma_wati70

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Ahmad Dwi Setyawan

Irmawati Irmawati, MEIMULYA MEIMULYA, Asmi Citra Malina AR Tassakka, Nadiarti Nadiarti, Nita Rukminasari, Ince Ayu Khairana Kadriah, Hasan Nasrullah, Alimuddin Alimuddin:

We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Identification, genetic diversity, and comparative evolution of the striped snakehead Channa striata (Bloch, 1793) in Wallacea".

Our decision is: Revisions Required

Reviewer A:

-This manuscript has outdated references. At least, you need to compose a minimum 80% of scientific journals published in the last 10 years (2012-2022) and maximum 10% of reference in Indonesian.

Recommendation: Revisions Required

Our decision is: Revisions Required

Reviewer A:

Dear Authors,

Thank you for submitting this interesting paper that investigated the genetic diversity of the *Channa* snakehead, using the CO1 gene. Your work is well formatted with a clear rationale. There is some potential value to the paper from an evolutionary standpoint.

I have added some comments to the word document version of the paper to be addressed. Additionally, please consider your justification for the four locations you sampled in the study. It isn't clear from your paper whether these are the only four locations that the species can be found in the region. If they are not, could you explain why these particular sampling sites are selected.

With these revisions, the paper should be in a good position for consideration.

Recommendation: Revisions Required
