Comments to the author

Reviewer 2: Dear Dear authors

Manuscript number COGENTENG-2022-0364, Title: Factors Influencing Urban Consumers on Selecting Electricity Saving Home Appliances for Managing Energy Consumption in Indonesia.

The manuscript deals with an important topic of rationalizing the consumption of electrical energy in homes.

It can be approved for publication if minor modifications are processed:

Add some results to the ABSTRACT.

Explanation of all symbols used at the beginning of the text in addition to the ABSTRACT.

Reducing the number of references mentioned in some paragraphs, especially that they are general, such as on page 2.

I think the use of the term "energy" is often better than "power" in the text, bearing in mind that the term "power" should be used in some sites.

I don't know why the authors use VA instead of W (watts)?

Also, the authors used a large number of studies, especially on page 3, without mentioning any results. What did they study? Please add some results and in which country because this is important for energy consumption, especially air conditioners.

The authors talked about the climatic factors influencing energy consumption and mentioned the temperature and precipitation, what influences the precipitation, and where the solar radiation is most important on the air conditioning load.

On pages 10 and 11, the questionnaire was explained. It is preferable to put the entire questionnaire as it is with all the information in it either here or in the appendix.

Please add the exchange rate between the local currency and the dollar, for example, under the table so that it is clear to the reader.

I think the language needs to be revised to be consistent, unrepitive, and more clear.

Sincerely,

Comments to the author

Reviewer 3: The idea of the flat research paper titled Factors Influencing Urban Consumers on Selecting Electricity Saving Home Appliances for Managing Energy Consumption in Indonesia is admirable and I thank the authors. But it is necessary to mention some points to improve the paper: 1. The comparison of innovative research ideas should be clearly stated. Its improvement requires more explanation than any other research paper or reference number 1;

2. The academic aspect of the article needs to be strengthened. There is no reference for the formula in the manuscript.

and references section; 3. The operational side of the paper is valuable, but needs further explanation.

4. Figures should be placed in larger sizes and separated from each other.

Other topics in the manuscript; 5. Please correct and insert the tables academically.

6. The conclusion of the article needs a more complete explanation. Correcting the mentioned items can lead to re-examination of the article.

Comments to the author

Reviewer 3: Thank you for the answers of the authors, but there are still concerns that have not been resolved

1- In the introduction of the research question, it is not clear, please add it in a paragraph to the introduction, how "Electricity Saving Home" faces the challenge.

3- Use more sources in the introduction (remove old sources). The sources used in the article are old. For example, consider the following articles.

A-<https://doi.org/10.1049/tje2.12218>

B- <https://doi.org/10.1080/23311916.2022.2072568>

C-<https://doi.org/10.3390/wevj13120222>

D-<https://doi.org/10.3390/smartcities4030063>

3- The images are still of poor quality, use Edraw max software to draw properly, after finishing, save it in jpg format in 1200x1200 file.

After doing this editing, the article is suitable for publishing
