Comments:
While examining your submission, we observed that it was based on a survey where participants were asked questions relative to issues like personal competences, work experience, etc. Following the journal's ethics policies, your work is classified as "Studies requiring both ethics approval and consent".

Before proceeding with the peer-review of your work we are requesting to submit a copy of the ethics approval from your institution and the consent form that was distributed to participants.

Data in Brief (optional):
We invite you to convert your supplementary data (or a part of it) into an additional journal publication in Data in Brief, a multi-disciplinary open access journal. Data in Brief articles are a fantastic way to describe supplementary data and associated metadata, or full raw datasets deposited in an external repository, which are otherwise unnoticed. A Data in Brief article (which will be reviewed, formatted, indexed, and given a DOI) will make your data easier to find, reproduce, and cite.

You can submit to Data in Brief when you upload your revised manuscript. To do so, complete the template and follow the co-submission instructions found here: www.elsevier.com/dib-template. If your manuscript is accepted, your Data in Brief submission will automatically be transferred to Data in Brief for editorial review and publication.

Please note: an open access Article Publication Charge (APC) is payable by the author or research funder to cover the costs associated with publication in Data in Brief and ensure your data article is immediately and permanently free to access by all. For the current APC see: www.elsevier.com/journals/data-in-brief/2352-3409/open-access-journal

Please contact the Data in Brief editorial office at dib-me@elsevier.com or visit the Data in Brief homepage (www.journals.elsevier.com/data-in-brief/) if you have questions or need further information.

Title: THE EFFECT OF HUMAN CAPITAL AND PHYSICAL CAPITAL ON REGIONAL FINANCIAL CONDITION: THE MODERATING EFFECT OF MANAGEMENT CONTROL SYSTEM
Journal: Heliyon

Dear Dr. Usman,

Thank you for submitting your manuscript to Heliyon.

We have completed the review of your manuscript and a summary is appended below. The reviewers recommend major revisions are required before publication can be considered.

If you are able to address all reviewer comments in full, I invite you to resubmit your manuscript. We ask that you respond to each reviewer comment by either outlining how the criticism was addressed in the revised manuscript or by providing a rebuttal to the criticism. This should be carried out in a point-by-point fashion as illustrated here: <https://www.cell.com/heliyon/guide-for-authors#Revisions>

To allow the editors and reviewers to easily assess your revised manuscript, we also ask that you upload a version of your manuscript highlighting any revisions made. You may wish to use Microsoft Word's Track Changes tool or, for LaTeX files, the latexdiff Perl script (<https://ctan.org/pkg/latexdiff>).

To submit your revised manuscript, please log in as an author at <https://www.editorialmanager.com/heliyon/>, and navigate to the "Submissions Needing Revision" folder. Your revision due date is May 03, 2021.

We understand that the COVID-19 pandemic may well be causing disruption for you and your colleagues. If that is the case for you and it has an impact on your ability to make revisions to address the concerns that came up in the review process, please reach out to us.

I look forward to receiving your revised manuscript.

Kind regards,

Editor and Reviewer comments:

Reviewer #1: This study has an original idea particularly on understanding the predictor of financial condition in Indonesia. It also brought two important antecedents of a country's financial conditions; human capital and physical capital. However, there are some suggestions that must be addressed before this manuscript is considered for publication. I recommend publication for this manuscript but also suggest some revisions to improve its quality.

Methods:

1. For the method section, if it is possible, please indicate how many potential participants for this study. Also, please discuss whether or not this number had enough power to reduce type II error?
2. Please round the coefficients two digits after point (e.g., .826 becomes .83)
3. The measure section needs some significant revisions. Please include model fit indices (i.e., chi-square, df, p-value, RMSEA), also compared the measurement model with other alternative models to reduce biases. Is this a self-report or expert rating scale? Please give an example of items.
4. In terms of data analysis, please explain why authors prefer HRM technique to Structural Equation Modeling. I understand that HRM is popular among social scientists, but authors should have some reasons regarding its used in this manuscript.

Results:
Results were in-line with research questions and and hypotheses. However, I have some concerns related to multicollinearity, did authors mean-center the predictors during before performing the HRM? Why/Why not?

Interpretation:
sounds, the authors were able to draw connection between theories and findings
