Content:

Unclean cutlery can be contaminated by bacteria. The presence of bacteria in the cutlery can be due to poor seller hygiene behavior as well as the application of unsanitary feeding sanitation. This study aims to determine the description of hygiene and sanitation with bacterial contamination on the cutlery in elementary School in Barrang Lompo, Makassar. The type of this research is descriptive research. The sample consists of two components, namely respondent and food samples. Respondent data were obtained by using questionnaires and observation sheet. The food samples were taken using the swab method (rubbing the cutlery surface) and then taken to the microbiology laboratory for testing of bacterial biochemistry. A total of 5 respondents and 15 pieces of cutlery. From biochemical identification, 7 bacteria were found from 15 samples. Gram positive bacteria amounted to 46.7% and gram negative amount of 53.3%. The types of bacteria identified from the cutlery consist of; *Bacillus* sp. , *Enterobacter hafniae*, *Enterobacter cloacea*, *Enterobacter aerogenes*, *Acinobacter calcoaceticus*, *Alcaligenes faecalis* and *Klebsiella* sp. The conclusions of this study are all samples of food tested containing bacteria due to personal hygiene and sanitation of eating utensils that are less good so that trigger the onset of bacteria. The quality of washing water, washing methods and the completeness of sanitary tools such as shelves of cutlery should be the concern of traders to create good sanitation of

Keywords:

Bacteria, Cutlery , Hygiene and Sanitation

Topic:

Health risk

Presenter:

Agus Bintara Birawida

Type:

Oral Presentation

The Letter of Acceptance (LoA) and Letter of Invitation (LoI) can be downloaded directly from your account, once your abstract is accepted to be presented.

Thank you.

Best Regards,

Dear Authors,

We are pleased to inform you that your abstracts have been accepted to be presented in 'The 1st International Conference on Global Issue for infrastructure, environment & socio-economic development' (GIESED2018) at Makassar on August 30th-September 1st 2018. If the reviewer has requested any revision, it must be revised.

Please find your Letter of acceptance (LoA) in the **submission system** which the example can be seen in attachment file (file1).

please complete the payment and full paper via **submission system not by email** (<http://giesed2018.interconf.org/submission/>).

For authors who will submit full paper/s please follow the format of full paper according to the instructions in the attachment file (file2). We recommend you to use template in this attachment file.

Thank you very much, and apologize if you find this email repetitive.

Dear all participants of **GIESED** 2018

We are proud to inform you that **GIESED** will be indexed by scopus (IOP) as the agreement can be seen in the attachment.

We also sent a draft book for the program, please read it carefully your schedule.

There are two reasons why your name is not included in the program book:

1. not collecting full paper
2. Not paid yet.

To include your name in the program book, please complete the full paper and collect proof of payment through **the submission system, not via email.** after that please confirm the committee via email or WA +6281287741963
