studies and analyze their results completely.

Reviewer #4

The main concern about the manuscript is its contribution to knowledge. It is expected that a critical gap analysis will be done in the introduction section to justify the necessity of doing this piece of research. It is partially done by the authors but it should consider all aspects of the problem including assumptions, limitations and constraints, pros and cons, and relative merits to the other publicly available studies and proposals.

- The research contributions of the paper should be articulated more clearly. The abstract is not representative of the content and contributions of the paper. The abstract does not seem to properly convey the rigor of research.
- Aside from the aim stated in the title, the research gap and the goals of the research are not specified which leads to the reader missing the significance of the research.
- The discussion section needs to be described scientifically. Kindly frame it along the following lines:
 - Main findings of the present study;
 - Comparison with other studies;
 - Implication and explanation of findings;
 - Strengths and limitations.
- Conclusion:
 - Update the conclusion to include the newly formulated theoretical contributions;
 - Mention the limitations of the study and prospects for future research;
 - Summarize the key results in a compact form and re-emphasize their significance;

beginning, end of the research.

- The discussion section needs to be described scientifically. Kindly frame it along the following lines:
 - Main findings of the present study;
 - Comparison with other studies;
 - Implication and explanation of findings;
 - Strengths and limitations.
- Conclusion:
 - Update the conclusion to include the newly formulated theoretical contributions;
 - Mention the limitations of the study and prospects for future research;
 - Summarize the key results in a compact form and re-emphasize their significance;
 - Summarize how the article contributes to new knowledge in the domain.

Technical Editor Comments:

- Please add an ORCID for at least one author.
- If one of the referees has suggested that your manuscript should undergo English revisions, please address this issue during revision. We propose that you use one of the editing services listed at <https://www.euhara.org/language-editing-services/> or have your manuscript checked by a native English-speaking colleague.

Dear Dr. Latief:

We have reached a decision regarding your submission to Civil Engineering Journal, "Labor Productivity Study in Construction Projects Viewed from Influence Factors".

Our decision is to: Minor Revision Required

Please consider the reviewer's comments and revise it as soon as possible. If you do not submit the revision file, the article will be withdrawn within 5 days.

When you revise your manuscript, please highlight the changes you make in the manuscript by using the track changes mode in MS Word or by using bold or colored text.

** Please upload the revised version into your user home> Review tab> Author Version.

Regards,
Editor in Chief M. R. Kavianpour
Kavianpour@civiljournal.org

** Please upload the revised version into your user home> Review tab> Author Version.

Regards,
Editor in Chief M. R. Kavianpour
Kavianpour@civiljournal.org

Reviewers' Comments:

Reviewer #1:

- 1- The English language should be edited by a native English-speaking proofreader because there are some typographical and linguistic errors that should be corrected.
- 2- Abstract is too long and should be modified: the abstract should contain Objectives, Methods/Analysis, Findings, and Novelty/Improvement. It is suggested to present the abstract in one 200 words paragraph.
- 3- Please check the figures number. Figures should be numbered in order.
- 4- The quality of the figures 1 (flowchart) and 4 to 12 is weak. The editable source of the figures figures 1 (flowchart) and 4 to 12 should be used in the manuscript.
- 5- It is important to add "Funding", "Author Contributions", "Data Availability" and "Conflict of Interest" statements at the end of the article.

Dear Dr. Latief,

I would ask you to check the pre-publication format of your article in Civil Engineering Journal and modify some queries, which have been asked by comments.

You have 24 hours to send back the final version. You should highlight or use track-changes to show the modification.

Regards,
C.E.J.
