Comments:

Reviewer 1

1. This paper describes the performance evaluation using LoRa Measurement tool then introduced the implementation of this measurement tool in a Crab Park environment.
2. Enhance literature survey.
3. Data analysis using statistical tool is required.
4. Conclusion part is missing.

Reviewer 2

Need to be improved.

Reviewer 3

1. It is not enough academic background or work done at all.
2. No information is provided regarding the tool in detail or how have they even validated that the tool is actually good.
3. The explanation about the test is not enough to make comments on the accuracy of the results.
4. A lot more work could be done and well presented. Academically, not enough to be published as of yet, but maybe when more scenarios and environments are tested.
