Dear Mrs. ,

After a rigorous review, with pleasure we would like to inform you that your paper with ID/Title: #1570609689 ('The Detection of Megalopa Phase Crab Using Image Processing') for 2nd ISRITI 2019 has been **accepted** to be presented and published in The 2019 International Seminar on Research of Information Technology and Intelligent Systems (ISRITI) - 2nd ISRITI 2019 which will be held in Yogyakarta, Indonesia during 5 - 6 DESEMBER 2019.

The blind review process has already taken from three reviewers and the result attached to this email. You have to revise your paper aligned with the review results.

The reviews are below or can be found at <https://edas.info/showPaper.php?m=1570609689>.

Please take some steps below.

1. Please register and make a payment to the conference through EDAS system.
2. Please download the Camera Ready of IEEE Full Paper A4 Template from the website of <http://bit.ly/ISRITI2018>.
3. Send the revised full paper in IEEE PDF eXpress format (see Instructions for IEEE PDF eXpress in the website of <http://isriti.akakom.ac.id/>).
4. Please provide Plagiarism Checker. Please be aware, according to IEEE regulation the maximum similarity score has to be less than 30%.
5. Login to EDAS, and fill in the Electronics Copyright Form (ECF) and Presenter.

Moreover, if you are from foreign countries, we would like to inform the best way to travel to Yogyakarta. You can take a flight through Jakarta, Indonesia using international flight and travel from Jakarta to Yogyakarta using domestic flight. you can get into the GRAND ZURI MALIOBORO HOTEL by using Taxi. If you come from any ASEAN countries there are available some low fare flight directly to Yogyakarta.

Please email us if you have any questions related to 2nd ISRITI 2019.

### Review 1

**Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.**

Average (3)

**Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.**

Average (3)

**Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references**

Good (4)

**Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.**

Good (4)

**Recommendation: How do you rate your recommendation?**

Accept. (3)

**Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.**

The conclusion can be elaborated.

**Review 2****Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.**

Average (3)

**Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.**

Average (3)

**Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references**

Average (3)

**Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.**

Average (3)

**Recommendation: How do you rate your recommendation?**

Possible Accept. (2)

**Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.**

This research focuses on the detection process of the megalopa phase crab larvae using a convolutional neural network (CNN) method.

1. Proofreading must be done to this manuscript
2. Related works are missing and the state-of-the-art is unclear
3. The figures could not be read, make it bigger and clear
4. The technical flow of content should be written e.g. algorithm equation, pseudo-code of the algorithm, etc
5. Add some updated references or paper recently

**Review 3****Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.**

Average (3)

**Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.**

Below Average (2)

**Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references**

Average (3)

**Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.**

Average (3)

**Recommendation: How do you rate your recommendation?**

Possible Accept. (2)

**Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.**

The paper is too short, please add more discussion and result.

The methodology should be clear, detailed in technique.

Update some recent references.

Make sure the figures are readable.

Kind Regards,

-----
