Dear Drs. Andang Suryana Soma, Andi Alfian Zainuddin, Shanti Riskiyani, Nurhaya Nurdin, Muhammad Firdaus Kasim and Joko Hendarto, Masriadi,

I must apologize for taking much longer time than normally. The reason is that it has been difficult find reviewers able and willing to comment. However, finally this was achieved and I attach here the points made regarding your manuscript "Geospatial Mapping of Distribution and Risk of COVID-19 in South Sulawesi". It has now been examined by external referees and subsequently re-evaluated by the Journal's editorial team in accordance with the principles of peer review (<http://www.icmje.org/#peer>), which is fundamental to the scientific publication process and the dissemination of sound science.

All referees agreed that this manuscript is of relevance to the Journal and potentially acceptable for publication. However, as you can see in the comments below, we suggest some minor changes, that you may wish to consider before the final decision is taken.

To facilitate the review process, we kindly ask you to either enter modifications in the original manuscript using new text in a different colour or to utilize "Track Changes". In addition, we would require a cover letter explaining, point by point, how you have modified your paper in response to the referees' comments.

Important: we recommend that you consult the Authors' Guidelines to ensure that your revised manuscript is written in accordance with the Journal's editorial format (with particular regard to the title page, tables and references). The manuscript should be written in British English.
The revised manuscript, edited in .DOC format, should be resubmitted electronically within 2 weeks from the date of this letter.

Although your paper is deemed of considerable interest, please be aware that this letter does not constitute an acceptance for publication, the final decision for which rests with the editorial team.

Thank you very much for sending your work to Geospatial Health. We look forward to receiving a revised manuscript in due course.

With best regards,

Robert Bergquist

Dear Dr. Andang Suryana Soma, Andi Alfian Zainuddin, Shanti Riskiyani, Nurhaya Nurdin, Muhammad Firdaus Kasim, Joko Hendarto, Masriadi,

Thank you for sending a revision of your paper "Geospatial Mapping of Distribution and Risk of COVID-19 in South Sulawesi". We have been waiting for your cover letter from you explaining, point by point, how you have modified your paper and how changes had been made as requested in my message with the attached version edited by us. Modifications should be entered with text in a different colour or by "Track Changes".

I just checked the first paragraph in your revised version and noted that it was different but lacking the references I asked for and not accepting the reference suggested. I attached once more the version edited by us in December 2021 asking for queries to be responded to and changes made were asked for. Please use this version for changes and upload as before at the journal's website.

Important: we recommend that you consult the Authors' Guidelines to ensure that your revised manuscript is written in accordance with the Journal's editorial format (with particular regard to the title page, tables and references). The manuscript should be written in British English.

The revised manuscript, edited in .DOC format, should be resubmitted electronically within 2 weeks from the date of this letter.

Although your paper is deemed of considerable interest, please be aware that this letter does not constitute an acceptance for publication, the final decision for which rests with the editorial team.

Thank you very much for sending your work to Geospatial Health. We look forward to receiving a revised manuscript in due course.

With best regards,

Robert Bergquist

Dear Dr. Zainuddin,

Thank for sending the revision of our paper entitled "Geospatial Mapping of Distribution and Risk of COVID-19 in South Sulawesi"

Thank you very much for sending your work to Geospatial Health. We look forward to receiving a revised manuscript in due course. I have edited the first sections but I must admit I did not quite understand all the different groups of people referred to. Please describe in detail, preferable using a diagram as suggested in the attached edit.

Your results are clearly of interest. The first part is in good shape and I hope our collaboration can result in making the following text also easy to read and understand.

Please use the version attach for all changes.

For the next revision, please place all figures at the end as I started to do, and just mark where they should go in the text.

With best regards,

Robert Bergquist

Dear Dr. Soma, and coauthors,

Thank you for sending the revision of your paper no. 1034. It is now in good shape but I have made some more edits and there is a few more questions. If possible, please send back soon as I would like to include this paper in the forthcoming special issue on Covid-19 of the journal.

No cover letter is needed.

Best regards,

Robert Bergquist

Dear Dr. Andang Suryana Soma and coauthors

Thank you for your latest revision. Please find edit 5 that just asks some final questions, that have been highlighted in the attached version, of the paper.

No cover letter is needed this time.

I was wondering why the are first for groups at the top of Figure 4 and then another 4 groups at the bottom? This is of course acceptable but it would be good to have a brief explanations what the are two different group sortings. This can be done as a separate paragraph under Discussion.

Regards,

Robert Bergquist

Dear Dr. Andang Suryana Soma, Andi Alifan Zainuddin, Shanti Riskiyani, Nurhaya Nurdin, Muhammad Firdaus Kasim, Joko Hendarto, Masriadi,

We are pleased to inform you that your paper entitled "Geospatial Mapping of Distribution and Risk of COVID-19 in South Sulawesi" has been accepted for publication in Geospatial Health. Your paper will now undergo a final copy-editing to make it compliant with the journal's guidelines. You will have the opportunity of approving or discussing any change made by our copy-editor before publication.

In order to start the process to publication, you are now required to pay the Article Processing Fee of EUR 750 (+VAT, if applicable). Please be informed that payments carry an administrative charge of € 30, tax included). Full details on the Article Processing Fee and methods of payment admitted are available here: <https://www.geospatialhealth.net/index.php/gh/fee>

The corresponding author is required to download, complete and sign the "Copyright and Licence" form, which is available at ([License Agreement](#)). Each author is requested to download and complete the "Conflict of Interest" form, which is available at ([Conflict of Interest](#)). All forms should be sent by e-mail to: Dr. Paola Granata at paola.granata@pagepress.org

Please note that these signed documents are needed before proceeding to publication.

With kind regards,

Robert Bergquist
