Manuscript 120355 to JRM External

Åsa Lundell <asa.lundell.jrm@gmail.com> to me Thu, Nov 26, 2020, 8:52 PM

Concerning your manuscript no 120355: Cartilage Oligomeric Proteinase (COMP) and urinary C-termina...

Dear Dr Yose Waluyo,

Thank you again for submitting your manuscript to the Journal of Rehabilitation Medicine. Your manuscript has now been reviewed by two reviewers with expertise in the area, and you can find their comments in the attachment.

I am sorry to say that we are unfortunately unable to accept your paper at its current state. It may, however, be resubmitted for re-evaluation if you are willing to revise it according to the comments received, along with a point-to-point response to the reviewers' comments and a list of all changes made. Even if you do not agree to all comments given please clearly state so and explain why. Please note that even if the reviewers request additional information, the total length of the paper must not exceed the stipulated maximum number of words, i.e. 4500 for Original Reports and max 40 references.

Please change from "mean±SD" to "mean (SD)" throughout the paper, in accordance with the author instructions and statistical guidelines.

Please also check that all references are correctly formatted, noting that the reference style in Journal of Rehabilitation Medicine is:
 Example: J Rehabil Med 1998; 7: 111-119
 I.e.: no dot after journal name, no issue number, no month and full last page (111-119, not 111-9). All authors up to six should be given, if more than six add "et al.". For more information please visit: <https://www.medicaljournals.se/jrm/reference-style/>.

Please also consider quoting papers published in our journal when making your revision.

Concerning your manuscript no 120355: Cartilage Oligomeric Proteinase and urinary C-terminal telop...

Dear Dr Yose Waluyo,

Thank you for the revised version of your manuscript which now has been re-examined by the reviewers. Your paper has been improved but one of the reviewers has still some comments (encl).

Please replace all abbreviations in abstract and in conclusion of the discussion. Your manuscript needs linguistic revision and should be edited by an English language service or a native English speaker. The title need to be more accurate and attractive, please see suggestion below:
Dextrose prolotherapy is more effective in improving clinical outcome and biomarkers than Hyaluron Acid in Knee Osteoarthritis: A randomized controlled trial.

All comments from the reviewers have to be fully answered and if you disagree you clearly have to state so.

Return the re-revised version as soon as possible together with a point-to-point letter with your response to all questions raised by the referees and a list of all changes made. Please note that even if the reviewers request additional information, the total length of the paper must not exceed the stipulated number of words, i.e. 4500 for Original Reports and max 40 references.

Concerning your manuscript no 120355: Cartilage Oligomeric Proteinase and urinary C-terminal telop...

Dear Dr Yose Waluyo,

Thank you for the revised version of your manuscript, which has now been accepted for publication in the Journal of Rehabilitation Medicine.

Before sending you the formal acceptance letter your manuscript will however go through the production process (i.e. language check, typesetting etc). This process will take approximately 4 weeks.

With best regards,

Asa Lundell

Dear Dr Yose Waluyo,

Congratulations! Your paper mentioned above has now been accepted for publication in Journal or Rehabilitation Medicine. Therefore, please sign the enclosed "Licence to Publish" agreement and return to us as soon as possible. We also enclose a "Payment Form" to be filled in and returned to us at your earliest convenience, preferably via e-mail. As soon as we have received your payment preferences you will receive either a link for payment online or an invoice. Please note that your paper will not be published until full payment has been received.

Since your paper is accepted for publication it will now also be sent for inclusion in PubMed, at a first stage as Epub ahead of print. When we have finalized the copy-editing process you will receive a proof for approval, and until the proof correction process is finalized your paper will be marked as "This paper is still in the correction phase". Hence the readers will only be able to see the title and abstract until then.

Please watch out for the proof which will be sent via e-mail shortly. Please keep a copy of the final version of your manuscript and compare it with the proof to make sure that no mistakes have been made in connection with the linguistic check.

We look forward to receiving the Licence to Publish and the Payment Form within short so that we can make the publication process as short as possible.

Dear Yose Waluyo,

Your article (see above) has now been published in Journal of Rehabilitation Medicine 2021; 53: jrm00196. The article can be viewed on the journal website: www.medicaljournals.sa/jrm and will also appear in PubMed.

Please find enclosed a pdf of the final version of your article. We encourage you to post your article on your university repository, if applicable, and or your own website. Please note that you are free to share the article as long as it is for non-commercial purposes.

We would also be happy if you joined our Facebook site <https://www.facebook.com/JRehabilMed>, and Twitter site: <https://twitter.com/JRehabilMed>. Please feel free to share this link with your colleagues.

With best regards,

Åsa Lundell
