

## [OAMJMS] Editor Decision

2022-01-16 11:19 PM

Nadirah Rasyid Ridha, Dasril Daud (Author):

We have reached a decision regarding your submission to Open Access Macedonian Journal of Medical Sciences, "Comparison of Bone Marrow Aspiration Interpretation with Immunophenotyping in Children's Leukemia Diagnosis", Manuscript ID = OJS8378.

Our decision is: Revise your manuscript until February 15, 2022 and submit on the OAMJMS website.

Sincerely,  
Prof. Dr Mirko Spiroski,  
Editor-in-Chief, OAMJMS

Scientific Foundation SPIROSKI,  
Rajko Zhinzifov No 48,  
1000 Skopje,  
Republic of Macedonia

-----  
Reviewer A:

This is an interesting study and it has some novelty as there are few studies conducted on this topic. I believe it should be published after the Authors perform some revisions:

1. Firstly, I think the Authors should confirm whether the immunophenotyping were taken from bone marrow or peripheral blood or both in the manuscript?
2. It is very important for blast and lymphoblast percentages in peripheral blood to be put on Table 1 (median and range) as it is an important confounding factor in the concordance between bone marrow and immunophenotyping. High percentages of peripheral blood blast generally reduce discordance between bone marrow and immunophenotyping for leukemia diagnosis. Thus, without blast and lymphoblast data on the manuscript, readers will be unable to accurately determine the applicability of the manuscript.
3. Did the authors exclude bone marrow aspiration procedure that failed to gain adequate sample for this study? Kindly describe in the method section
4. Also, the Authors should confirm whether the bone marrow interpretations were conducted by attending physicians or medical residents.

Recommendation: Revisions Required  
-----

-----  
Reviewer B:

Well documented study. It can be considered for publication. For the interest of readers, the authors may consider submitting data on hematological lab results and comorbidities of the patients. Discussion can be improved with latest literatures

Recommendation: Revisions Required  
-----

-----  
Reviewer E:

1. RESPONSE TO AUTHOR AND EDITOR

After reading the entirety of this article, there are some corrections, clarifications, and questions.

1. **In Introduction Section** : The references used are not standard, and the citation of the bibliography starts from the numbers 23, 45, and so on. The citation of the bibliography does not start with the first citation.
2. Many sentences are repeated, and several sentences have the same meaning.
3. The way of writing tables is confusing, as in Table 1, Table 2, Table 3.
4. There is citation number 511 that does not need to be quoted because it does not match the contents of this study.

With Regards,

-----  
Reviewer F:

This is a good study showing that there can be a discordance in acute myeloid leukemia diagnosis using bone marrow aspiration versus immunophenotyping. There are not many studies like this and the article is overall adequately written. I have a few suggestions to improve the manuscript:

1. "The American Cancer Society in 2014 found 15.780 newly diagnosed cases of cancer and a total of 1960 cancer deaths that occurred in children and adolescents from birth to 19 years of age. The incidence of cancer in children each year is estimated at 186.6 per 1 million children from birth to 19 years of age. Based on 2013 basic health research data, the national prevalence of cancer in the population of all ages in Indonesia is 1.4% or around 347.792 people" - This paragraph needs references
2. The authors should make a conclusion after discussion
3. I do not see discussion on the discordance in acute myeloid leukemia diagnosis using 2 different methods. I believe it would be interesting to write a potential hypothesis on this issue. Also, are there studies on other hospitals in the Author's country with similar or different results? It would be interesting for a comparison to be made.

Recommendation: Revisions Required

Your submission "Comparison of Bone Marrow Aspiration Interpretation with Immunophenotyping in Children's Leukemia Diagnosis" to Open Access Macedonian Journal of Medical Sciences now needs to be proofread by following these steps.

1. Click on the Submission URL below.
2. Log into the journal and view PROOFING INSTRUCTIONS
3. Click on VIEW PROOF in Layout and proof the galley in the one or more formats used.
4. Enter corrections (typographical and format) in Proofreading Corrections using "[Mark up text with edits](#)" or "[Use annotation and drawing markup tools to add comments in PDFs](#)".
5. Save corrected Galley Proof with the addition "Corrected" to the file name (i.e., OAMJMS-9A-4528.pdf should be saved as OAMJMS-9A-4528-Corrected.pdf).
6. Click on the link "Add Discussion", define Subject "Corrected Galley Proof", write text in the field Message, Upload File in the field Attached Files.
7. Complete and sign **Copyright Form**, upload in the field Attached Files, and complete the message with clicking "OK".
